COMPANY PROFILE

HERN, s. r. o.

is a well-established engineering company specializing in the design, manufacturing, and supply of components for global industry leaders across various sectors.

The company's core operations include the production of welded and machined parts and assemblies with surface treatment, serving sectors such as agriculture, construction machinery, material handling equipment, engineering manufacturing, and automation. Currently, the company employs approximately 560 people.

BRIEF HISTORY

1954 – 1992: Company Establishment

- production of components for mining, tractor and construction machinery, steering parts, and brake components.

1992 – 2006: Privatization and Transformation

- beginning of collaboration with leading manufacturers of construction and agricultural machinery
- production of welded parts and assemblies for tractors, bulldozers, loaders, road rollers, combines, mowing machines, and baling machines

2006 – 2017: Entry of a New Investor

- gradual stabilization of the company's financial situation, followed by development in quality, productivity, and innovation
- expansion of the company's client portfolio and development of partnerships with other major global manufacturers across various sectors
- **company name changed from ZTS Strojárne, s.r.o. to HERN s.r.o.**

QUALITY

We understand our customers' expectations and continuously strive to improve the quality of our products and processes.

OUR EMPLOYEES

560

We believe that even today, our people remain our most valuable asset. That's why we put every effort into showing them they are more than just numbers — they are 560 proactive professionals we can rely on every day.

PRODUCTS AND SERVICES

The company produces

2 500

types of finished products annually for its customers, comprising more than 20 000 subassemblies.

MANUFACTURING TECHNOLOGY

- cutting (laser cutting, shearing, sawing)
- shaping (press braking, pressing, bending of profiles and bars)
- welding (manual or robotic)
- machining
- surface treatments (cataphoretic coating, powder coating)
- other processes (blasting, deburring, degreasing, assembly, and packaging)

INFRASTRUCTURE

Located in the heart of Europe, the company benefits from easy access to major European road networks, enabling fast, flexible, and efficient transportation for our customers.

STRATEGY

The company's strategic goal is to achieve €100 million in revenue by the end of 2030, establish itself as a leader in our segment within the European region, and collaborate with clients who are global leaders in engineering.

The greater our customer's success, the greater our own.
